

Seating & Portable Flooring

Wood Folding & Cocktail Tables

Our Wood Event Tables are the perfect blend of durability, pleasing aesthetics and ultimate value. The table tops are constructed of reliable 7 ply ACX Birch plywood and feature heavy-duty "T" mold rubber edging. The folding legs are commercial grade coated steel and each table comes with hardwood runners for easy stacking and storage. Also available with metal edging. Please call for current pricing.

ULTRAdeck

Portable Event Flooring

UltraDeck™ (EDU) is a modular, heavy duty flooring system for tents, stadiums, arenas, concerts, trade shows, expos and any type of special event. This system is meant as a true substitute for lay down and built-up plywood floors. It provides a rigid and uniform feel underfoot that is suitable for high-end events. Each EDU module is 24" × 12" × 1 1/2" and ships in 3' × 4' sheets for quicker deployment. From a 400 sq/ft party tent to an 80,000 sq/ft turf arena, EDU offers the ultimate portable floor for all types of events! Available with or without aeration holes.

DanceDeck™ is a durable and lightweight Vinyl alternative to heavier wood floors. Each 1 sq/ft tile weighs 2 lbs. and is easy to store and transport. A 3ft x 3ft DanceDeck™ section weighs only 16 lbs. and is comfortably handled by one person. Unlike most traditional dance floors, DanceDeck™ does not need to be sanded or refinished. Simply mop or clean DanceDeck™ using water and standard cleaning fluids. Each floor tile is durable and weather resistant and will not warp, rot, crack, fade, or delaminate. Unlike traditional floors, DanceDeck™ is non-absorbent and allows water to flow underneath.
